

FortiToken™ -Mobile

One Time Password Application for the Mobile Device

Superior Strong Authentication Using Your Smartphone

FortiToken Mobile is an OATH compliant, time-based One Time Password (OTP) generator application for the mobile device. It is the client component of Fortinet's highly secure, simple to use and administer, and extremely cost effective two factor solution for meeting your strong authentication needs. This application makes Android and iOS devices (iPhone, iPad or iPod Touch) behave like a hardware based OTP token without the hassles of remembering and carrying yet another device.

Leverage Existing Fortinet Platforms

Besides offering out-of-the-box interoperability with any time-based OATH compliant authentication server, such as the FortiAuthenticator from Fortinet, the FortiToken can also be used directly with the FortiGate® consolidated security platform, including High Availability configurations. FortiGate has an integrated validation server for validating the OTP as the second authentication factor for SSL VPN, IPSec VPN, Captive Portal and Administrative login, thereby eliminating the need for the external RADIUS server ordinarily required when implementing two-factor solutions.

Ultra-Secure Token Provisioning

What makes this mobile OTP application superior to others on the market is that while being simple to use for the end-user, and easy to administer and provision for the system administrator, it is actually more secure than the conventional hard token. The token seeds are generated dynamically, minimizing online exposure. Binding the token to the device is enforced and the seeds are always encrypted at rest and in motion.

FortiToken Mobile Advantages

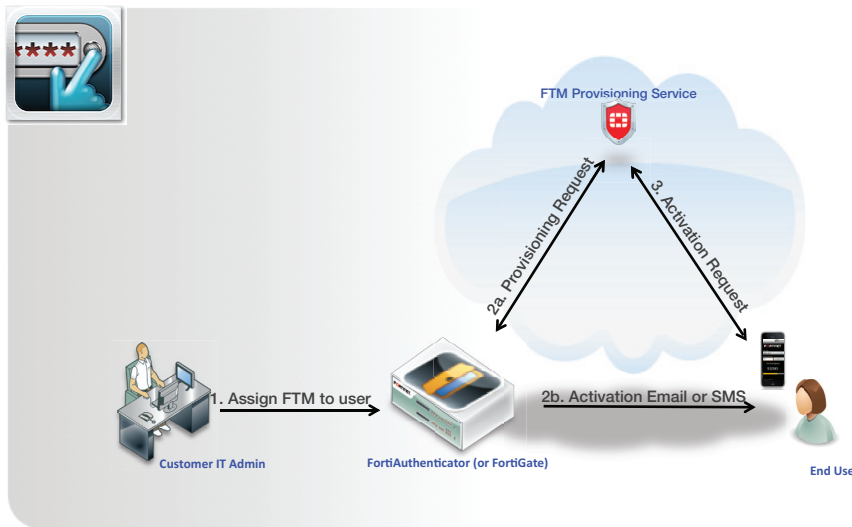

- Unique token provisioning service via FortiGuard™ minimizes provisioning overhead and ensures maximum seed security
- Perpetual token license and unlimited device transfers eliminates annual subscription fees
- Scalable solution leveraging existing end user devices offers low entry cost and TCO
- Reduces costs and complexity by using your existing FortiGate as the two-factor authentication server
- Zero footprint solution

Main Features

- OATH time based OTP generator
- Copy generated OTP to the clipboard
- OTP time interval display
- Serial Number display
- Token and app management
- Epoch time display
- PIN protected application
- Self-erase brute-force protection

Supported Platforms

- iOS (iPhone, iPod Touch, iPad), Android
- Wifi only devices supported (for over-the-air token activation)

Ordering Info			
Product	SKU	Description	Comments
FortiToken Software License Key	FTK-LIC-5	Software one-time password tokens for iOS and Android mobile devices. Perpetual licenses for 5 tokens.	FTM Redemption Certificate containing one license code for the number of token instances ordered will be issued, Enter License code into FortiGate or FortiAuthenticator to retrieve the tokens. Requires FortiOS 5.0 Beta 5 and up or FortiAuthenticator 1.4 and up.
	FTK-LIC-10	Software one-time password tokens for iOS and Android mobile devices. Perpetual licenses for 10 tokens.	
	FTK-LIC-20	Software one-time password tokens for iOS and Android mobile devices. Perpetual licenses for 20 tokens.	
	FTK-LIC-50	Software one-time password tokens for iOS and Android mobile devices. Perpetual licenses for 50 tokens.	
	FTK-LIC-100	Software one-time password tokens for iOS and Android mobile devices. Perpetual licenses for 100 tokens.
